### **AVFAB RECEIVES EASA STC APPROVAL ON HAWKER DIVAN SYSTEM**

**Clinton, MO – February 28, 2007 - AvFab** is proud to announce it recently received EASA STC approval on its 1, 2, 3 and 4-place divan systems for Hawker aircraft.

AvFab's Hawker divan system is available for all series beginning with the model numbers of DS.125, Bae-125, BH.125 or HS. 125, as well as the Hawker 800 and 1000 series. The kits include seat belts, shoulder harnesses, track fittings, installation instructions and weight and balance data. AvFab also offers specially designed divans to fit either side of the aft section of the cabin. Available options include armrests, top access panels, composite close-out panels, and composite drawers. An upgraded inertial reel shoulder harness option is also available.

"We are excited to be able to offer this line of divans to our European Customers," said Jeff Lowe of AvFab. "The variable length design of our Hawker divan systems really allows the operators to customize their aircraft, while enjoying the benefits of an STC to ease the installation burden."

AvFab provides inspection, repair and overhaul of corporate aircraft interior components, and is also an FAA-PMA producer of custom aircraft seating and cabin components. AvFab's sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 90,000 sq. ft. of OEM seats and cabin components. Together they represent a "one-source" solution to any corporate aircraft interior need. For more information on any of the products offered by AvFab, please call (660) 885-8317.
