**AVFAB RECEIVES STC AND PMA**  
**FOR CITATION 650 DIVANS**

**Clinton, MO – August 20, 2004** – AvFab is pleased to announce that it has received Supplemental Type Certificate (STC) and Parts Manufacture Approval (PMA) on their Citation 650 Divans.

The side-facing divan kits are available in 1, 2, 3 and 4-place variations, and are the latest STC to be added to AvFab’s list of over 130 certified products. Turnkey kits include the installation parts and components, detailed installation directions, diagrams and applicable weight and balance data.

These complete divan kits are designed to add seating capacity or a sleeping area to help specifically equip the aircraft to each owner’s unique needs. AvFab takes pride in providing value-added solutions to expand each particular aircraft model’s versatility and utility. They credit their customers with the idea of designing Divans that were affordable and provided flexible configuration changes to an already outstanding aircraft. Existing cabin chairs and/or furnishings removed for installation of the divan may have trade-in value based on aircraft model, year of manufacture and condition.

AvFab not only provides FAA-PMA custom aircraft seating with STC approvals, but it is also an inspection, repair and overhaul facility centered around serving the needs of corporate aircraft. AvFab’s sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 80,000 sq. ft. of OEM seats and cabin components. Together they represent a “one-source” solution to any corporate aircraft interior need. For more information on any of the products offered by AvFab, please call (660) 885-8317.
