**AVFAB OFFERS ENIDINE SEAT RECLINE ACTUATOR
REPAIR ALTERNATIVE**

Clinton, MO – December 20, 2002 – AvFab (Aviation Fabricators) recently announced that it received FAA approval to add Enidine Seat Recline Actuators to its CRS Ratings List (CRS# GVRR304K). Prior to AvFab’s development of a repair process, the only alternative to a broken or worn Enidine unit was to replace it with a new unit.

New replacement unit cost typically exceeds \$600 from the aircraft manufacturers. AvFab’s repair alternative costs just \$135 and has a two-day turnaround saving the user both time and money.

“We have had many customers mention the lack of service available for Enidine Recline Actuators, so we developed an overhaul procedure. We can now effectively service these units within 48 hours for a fraction of the cost of a new unit,” said Jeff Lowe, AvFab.

AvFab specializes in the inspection, repair and overhaul of corporate aircraft interior components and is an FAA-PMA producer of custom aircraft seating. AvFab’s sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers.

For more information on AvFab’s innovative Enidine Recline Actuator repair process or for a full range of capabilities and products, please call 660.885.8317 or visit www.avfab.com.
