**AVFAB GETS STC AND PMA APPROVAL FOR
HARD TO FIND JETSTREAM DIVANS**

Clinton, MO - March 14, 2004 - Aviation Fabricators is pleased to announce that it has received STC *and* PMA approval for its JetStream Divans. AvFab offers a right-hand and left-hand 2-place divan kit for 3101 and 3201 JetStream aircraft. The package also includes sidewall mounted harness kits, seatbelts and track-mounted hold-down fittings. Life vests and detailed installation instructions are included. The divan package is delivered in “green” condition without upholstery.

The 2-place divan installs in the existing seat tracks without relocating or modification, and opens up the forward cabin space tremendously. The package will especially benefit those operators looking to maximize the space available in an executive cabin configuration by mounting the divans facing each other. This configuration not only opens up the forward cabin area, but provides seating for a net gain of two additional passengers

AvFab’s STC and PMA approval allow JetStream operators to have the package installed without the need for field approval. And, AvFab’s outstanding customer service and industry-best lead-times ensure you get the right seating components, right on time. Typically, lead-time on the JetStream divan packages is two weeks.

AvFab not only provides inspection, repair and overhaul of corporate aircraft interior components, but is also an FAA-PMA producer of custom aircraft seating. AvFab’s sister company, Central Airmotive, is a comprehensive supplier of Original Equipment Manufacture interior products such as seats, divans, tables, toilets, cabinets and dividers. Central Airmotive currently has over 60,000 sq. ft. of OEM seats and cabin components. Together they represent a “one-source” solution to any corporate aircraft interior need. For more information on any of the products offered by AvFab, please call (660) 885-8317.
